

Spring Quarter 2012

Customer Insight Tools MKT452 Robert Schieffer (Section 61)

Uncovering insight into under-met needs of target customers is essential for developing products and services that deliver value to the target customer segment and generate profit for the organization. Building a marketing strategy based upon deep customer insight can give a firm a powerful competitive advantage.

This course focuses heavily on the qualitative tools used by marketers to uncover deep customer insights: observation, ethnography, netnography, depth interviews using projective techniques, group sessions, archetype research, neuromarketing and online communities. Qualitative tools used in B to B markets, such as customer visit programs and customer advisory panels are also covered. Students will have the opportunity for experiential learning with these tools in four assignments.

Expert guest speakers will be utilized to give students deeper insight into contemporary applications of these customer insight tools. These guest speakers are a mix of customer insight executives and customer insight consultants.

This course complements the required course for Marketing majors (Research Methods in Marketing – MKTG 450)

Experiential Learning

This course is heavily focused on experiential learning. 40% of the course grade is based upon an ethnography interview and the two presentations students will make based upon insight derived from these interviews. Student triads (groups of three) will present the results of their ethnography interview to the class during week 7; student teams (5-6 students) will present their integrated insights of all of the interviews to the corporate sponsor during week 10. Ethnography interviews will take place in the Evanston area; student triads should begin planning a time when they can complete their three hour ethnography interview during April 25-29, 2012.

Course Organization

There are three main components of this course:

- Class sessions: Classes will involve a blend of lectures, case discussions and guest speakers. Students are expected to contribute to the class discussions based upon their own business experience as well as their preparation of the required readings.
- o Teamwork: A significant amount of the work for this course will be done in triads and teams. Although this work is done entirely outside the classroom, students' contributions to these efforts are considered an integral aspect of the course.
- o Individual work: In addition to preparing for class sessions and group activities, students will do three assignments on an individual basis.

Communications and Office Hours

Blackboard is the main communication tool for this course, and includes the course syllabus, allassignments and all documents. All lecture slides, guest lecture slides, and course resources will be posted on the course Blackboard prior to each class. Students should review these prior to class and come prepared to discuss them. Students are welcome to come by the professor's office (Leverone 481) during office hours (T F 1:30-3:30 PM) as well as after class.

Triads and Teams

As noted above, teamwork is an essential component of the course. Teams will be formed during the first week of class. Teams will consist of 5-6 students, composed of 2 triads (needed for the ethnography interview). To ensure equal participation on team projects, team members will evaluate each other's performance using the Team Evaluation Form. This form is to be submitted anytime after the completion of the last team assignment and before the end of finals week.

Final Exam is a Team Presentation to Our Sponsor

The final exam is a team presentation of the ethnography integrated findings to our corporate sponsor. This will take place during week 10 on Wednesday, May 30. At least two members from each team must be present for this presentation to the sponsoring company. Teams need to discuss which students will make the final presentation, and hold times on that date.

Course Readings

A course packet is required and is available for your iPad and in hard copy.

The **required book** is *How We Decide*, Lehrer, 2009. This book explores the major role that the unconscious mind plays in consumer decision making, based upon current research in neuroscience

Should you desire additional reading, I recommend several excellent books. However, these books will not be the explicit focus of our class discussion and, therefore, are *not* required.

- A <u>recommended</u> book is *Influence: The Psychology of Persuasion*, Cialdini, 2007 Revised Edition, which explains the psychology of why people say yes, and the six universal principles of persuasion
- A <u>recommended</u> book is *Ten Key Customer Insights*, Schieffer, 2005, which provides best practices in customer insight, as well as a clear roadmap of how customer insight tools can used in both strategic and tactical marketing decisions
- A <u>recommended</u> book is *The Culture Code*, Rapaille, 2006, which is an excellent book for understanding how we acquire a silent system of codes as we grow up within a culture, and how these unconscious codes guide our actions and purchasing behavior

Grading

Each student's overall course grade will be based upon the following:

- o Class contribution 10%
- Three individual assignments 35%
 - Netnography 10%
 - Early Childhood Memories 10%
 - Individual Depth Interview 15%
- One triad assignment Ethnography presentation 15%
- Four team assignments 40%
 - The Sure Thing That Flopped case 5%
 - Saxonville Sausage case 5%
 - Iridium case 5%
 - Ethnography integration presentation 25%

All assignments are graded on a 100 point scale. Class contribution grading is based upon attendance (you can't participate if you're not here!), as well as the quality of the contributions that you make to advance and deepen the class discussion (*not* the amount of "air time"). Note that *cold calling* will be used on assigned readings.

Please feel free to ask any questions in or outside of class to maximize your understanding of the material. You will not be evaluated on questions that you ask to clarify lecture or course material. If you have a question, chances are that the same question is on the minds of some of your classmates as well. Thus, you are doing the class a favor by asking it.

Final grades usually range from A to C. The grading is in accordance with guidelines set by the dean's office for elective courses; the total number of A's in any given section will not exceed 45%. Keep in mind that your grade is not always a perfect indicator of your potential customer insight skills; it simply reflects your performance on the set of specific tasks outlined above.

Attendance Policy and Mandatory First Class Attendance

Students taking this course for a credit must attend the first class, as teams are formed for an assignment due during the second week. It is strongly recommended that students attend every class session. Missing more than two class sessions is strongly discouraged and may lead to a grade adjustment.

Honor Code and Classroom Etiquette

In addition to Kellogg's Honor Code, the following rules apply to this class:

- Written cases are to be prepared by team members only. The cases are not to be discussed with out-of-team members.
- o To provide an optimal learning experience, students are asked to refrain from eating and using laptops and smart phones during guest speaker presentations.
- o I have a no laptop and smart phone policy. Laptops and smart phones may not be used during class, except for making presentations to the class.

	DATE	TOPIC	READINGS & CASES
Week 1	T March 27	The Case for Customer Insight Who is the Customer?	P & G Chief's Turnaround Recipe: Find Out What Women Want
		Rational and Emotional Needs	Qualitative Inquiry in Marketing and Consumer Research
	F March 30	Overview of Customer Insight Tools How We Decide	How We Decide – Introduction and Chapters 2, 4 and 7
