PROFESSIONAL EXPERIENCE

MERRILL LYNCH – Quantitative Research & Global Markets

New York, NY

Summer Associate – 3 Rotations

June 2008 – Aug. 2008

- Equity Derivatives Research – helped develop a multi asset allocation model using 4 major asset classes. Measured the contribution of new asset classes to the portfolio's performance, and presented the project to managers and associates.
- Credit Strategy – Modeled the equity/credit link for financial firms. Identified the government “put option” in credit spreads of large banks. Also presented the project to the research group.
- Equity Structured Products – Back-tested simple strategies that attempt to extract the volatility premium in options.

COMISSÃO DE VALORES MOBILIÁRIOS – CVM SECURITIES AND EXCHANGE COMMISSION OF BRAZIL

Rio de Janeiro, Brazil

Intern, Office of Economic Analysis

April 1998 – Oct. 1998
