

Prerequisite Checklist for Managerial Analytics Certificate

Revised 11/18/13

Students interested in applying for the Managerial Analytics Certificate must take prerequisite courses in five (5) subject areas. Each requirement is fulfilled when one of the Options listed under that requirement below is completed.

Notes:

1. Students do not have to complete all of their prerequisite courses by the time they apply in January, but should have completed all of them by the end of the spring quarter. Those who are accepted into the program and are still taking prerequisite courses during the spring term must receive a "B" or better in those courses in order to enter the program in the fall.
2. Many CPU prerequisite courses have their own prerequisites, which are set by the departments offering them. Please check the Undergraduate Catalog or the appropriate department for specifics.
3. Equal consideration is given to students who take non-honors courses.
4. Most pre-req courses are offered in both WCAS and McCormick, and students may take them in either or both schools.
5. Students are required to have a combined 3.0 average among all Certificate Program prerequisite courses in order to apply. Receiving a letter grade below a "B" in any individual course is acceptable, as long as the overall average of all your prerequisite courses is 3.0 or higher.
