STUDENTS EARNING CERTIFICATES

About the Certificate Program for Undergraduates

The Kellogg School of Management Certificate Program for Undergraduates (CPU) is an elite program that offers exposure to – and preparation for – careers in consulting, financial services and other data-driven professions. Students choose from two certificates: Financial Economics (FE) and Managerial Analytics (MA). Both tracks help students improve their critical thinking skills, business acumen and understanding of strategic models that are used in a wide range of industries and occupations. The graduate-level courses offered are taught by Kellogg faculty. The program builds upon the solid educational grounding students receive at Northwestern University.
