

# Errata: A Test for the Number of Factors in an Approximate Factor Model

Gregory Connor and Robert A. Korajczyk

*Journal of Finance* **48** (September 1993): 1263-1291.

This note is to correct a typographical error in the last paragraph on page 1270 of the paper. It should read that the statistic

$$\sqrt{\frac{T}{2} - 1} \bar{\Delta}^n (2\hat{\psi}^n)^{-1/2}$$

is asymptotically  $t$ -distributed with  $(T/2)-1$  degrees of freedom. That is, the expression in the paper needs to be scaled by  $\sqrt{\frac{T}{2} - 1}$ .
