PTMBA Waiver Requirements- Business Analytics I (DECS 430-5)

DECS 430-5 is not available for waiver by application; to waive the course you must pass the waiver exam. Only full waivers are awarded for DECS 430 but even if you pass the waiver exam, you still will need to take or waive DECS 431 (Business Analytics II).

By Exam:

- Three-hour online exam which must be completed in one sitting and only one attempt is allowed.
- Topics covered are basic probability, expected value and variance, use of the central limit theorem, confidence intervals, hypothesis testing, and recognizing sample bias.
- Materials allowed: any reference materials and Excel (or similar product for normal distribution calculations).
- Registration still occurs through the regular means of signing up on KelloggGroups (see Waiver site for more information on registration). The exam link will be emailed to you by the Thursday after waiver registration ends and you will have through the weekend (Sunday at midnight) to take the exam. You do NOT need to take the exam at Wieboldt.

For additional information on administration of the waiver exam, please contact Carol Lucido.
